Collective Project Proposals

Student Life Management

An all-around **Android** application that tries to solve your student life problems in an easy and accessible way: assignments, syllabus, time tables, task management, contacts and other meaningful features that simplifies your student life. Data will be managed and provided through a backend.

4 developers needed (**Android** and **Backend**)

We will provide **UI/UX** design, **technical** and **product**-related guidance

Tech Interview Questionnaire

An **Android** tablet app that helps recruiters simplify the interviewing process, all this in a fun and interactive way. Data will be provided by algorithms on a backend, which generates the customized questionnaires based on the candidates past experience, skill-set and applied position. The questionnaires will contain multiple question types resulting in a detailed and visual evaluation.

4 developers needed (**Android** and **Backend**)

We will provide **UI/UX** design, **technical** and **product**-related guidance
